RETAIL PRICE LIST

RIVER'S EDGE FLOWER FARM
Nuttall, Virginia

Gloucester Co.
Daffodils 1942

Explanation of symbols: E means early, M means midseason, L means late. The varieties listed below are those in which we specialize. See page 3 for novel varieties. A peck contains usually 50 to 75 bulbs.

YELLOW WITH LONG TRUMPETS			
	Per 10	Per peck	Per bu.
E King Alfred - Solid, deep yellow-----	\$0.85	\$3.00	\$11.00
M Emperor - Petals lighter than trumpet	.45	1.75	6.00
M Olympia - Like Emperor, much larger-----	.75	2.25	8.00
INCOMPARABILIS (Short Trumpets)			
E Sir Watkin - Yellow cup, light yellow petals--	.50	1.25	4.50
E Helios - Deep yellow, very early	.85	3.00	11.00
M Croesus - Red cup, yellow petals-----	.85		
POETICUS (White, Red Eye)			
L Horace - Tall and pretty-----	.75		
			Per bu.
Mixed, 5 varieties, King Alfred, Emperor, Olympia, Sir Watkin, and either Croesus or Helios - (Please state choice.)			Peck \$2.25
Mixed, 10 or more varieties, above varieties included			Peck 2.50
Special Collection Offer: <u>15 selected bulbs</u> (doublenose) for <u>\$1.00</u> postpaid; 3 each of 5 varieties - King Alfred, Emperor, Olympia, Sir Watkin, and Croesus.			
<u>50 selected bulbs</u> (doublenose) for <u>\$2.50</u> postpaid; 10 each of same 5 varieties.			

POSTAGE is NOT PREPAID on PECK offers, but bulbs ordered by COUNT will be sent postpaid to the fourth zone (600 miles) for orders of \$1.00 or more. A peck weighs about 11 lbs. If you live within 150 miles of us, allow 19¢ for postage on a peck.

WHEN TO PLANT: September in the North, October in the South.
Where and how: Plant with base six or seven inches below surface of ground, in friable soil where moisture is available (but not where water stands). Caution: In spring cut leaves only after they die.

BULBS FOR NATURALIZING. Nearly all varieties of daffodils are good for naturalizing, i. e. planting in grass or in a light woods, without cultivation or digging for a number of years. On the whole small varieties will bloom in this way somewhat longer without overcrowding from multiplication causing the bulbs to dwindle below blooming size. However larger varieties make more of a show for the first few years, and should bloom at least four years even without being dug and separated.

A MIXTURE will lengthen the time of blooming and give variety to the planting. (Our mixtures bloom over a period of three or four weeks with moderate weather conditions.) A planting of all one variety will give a more brilliant effect when in bloom, however, as the whole patch will be golden at one time. If you buy one peck each of several varieties, you can make a beautiful effect by planting in drifts of different varieties. Our mixtures are largely mixed by hand at shipping time, and all bulbs are healthy and of good blooming sizes.

RETAIL PRICE LIST

RIVER'S EDGE FLOWER FARM
Nottali, Virginia

Explanation of symbols: E means early, M means midseason, L means late. The varieties listed below are those in which we specialize. For more for novel varieties. A peck contains usually 30 to 35 bulbs.

YELLOW WITH LONG TRUMPETS
E King Alfred - Solid, deep yellow
M Emperor - Petals lighter than trumpet
M Olympia - Like Emperor, much larger

INCOMPARABILIS (Sport Trumpet)
E Sir Watkin - Yellow and, light yellow petals

Special Collection Offer: 10 selected bulbs (double-ended) for \$1.00
postpaid, each of 5 varieties - King Alfred, Emperor, Olympia, Sir Watkin, Helios, Croesus
50 selected bulbs (double-ended) for \$5.00, each of 5 varieties

POSTAGE IS NOT PAID ON EACH ORDER, but you are urged to pay it. It will be sent postpaid to the fourth zone (\$3.00 value) or fifth zone (\$4.00 value) more. A peck weighs about 11 lbs. If you live within 100 miles allow 15¢ for postage on a peck.

WHEN TO PLANT: September in the North, October in the South. Where and how: Plant with base six or seven inches below surface of ground, in friable soil where moisture is available (but not where water stands). Caution: In spring cut leaves only after they are

BULBS FOR NATURALIZING. Nearly all varieties of double-ended bulbs are good for naturalizing, i. e. planting in grass or in a high wood, without cultivation or digging for a number of years. On the whole double-ended bulbs will bloom in this way somewhat longer without overgrowing than single-ended bulbs. The bulbs to double-ended bulbs are: Helios, Emperor, Olympia, Sir Watkin, Croesus, King Alfred. Larger varieties make more of a show for the first few years, but should bloom at least four years even without cutting and separating.

A MIXTURE will lengthen the time of blooming and give variety to the planting. (Our mixtures bloom over a period of three or four weeks with moderate weather conditions.) A planting of one or two varieties will give a more brilliant effect when in bloom, however, on the whole patch will be golden at one time. If you buy one peck each of several varieties, you can make a beautiful effect by planting in drifts of different varieties. Our mixtures are largely mixed by hand as spring time, and all bulbs are healthy and of good blooming class.
